Quality

Mozaïk, an answer for every requirement

Your customers are looking for practical, pragmatic and effective solutions, but do not want to sacrifice quality. By combining materials with good looks and good design, Sabert is able to offer some highly attractive disposable tableware. The proof is the loyalty of our customers to these practical solutions.

Consumer survey

Throw-away, OK, but make it attractive!

Disposable tableware is the ideal solution if you are throwing a party for more than 8 people. **But 40% of respondents nevertheless expected it to meet two requirements: quality and attractive appearance.**

Source: Attitudes & usages study - February 2012

A personal view

For a party, I choose Mozaïk!

Attractive shapes, colours, styles... With Mozaïk, I know I have plenty of choice when I throw a party, and I won't make any mistakes. Whether it is fairly formal or a bit on the crazy side, I've always got the tableware for the occasion.

A growing market

Disposable tableware is very much in demand

You invite friends round for an impromptu evening... It is not always easy for a hostess to get things ready in time. So disposable tableware is the ideal solution, to ensure the party goes with a swing. **28% of those who adopt this solution find it allows them to benefit from quality products while avoiding the disadvantages of having to tidy away or do the washing-up.**

an environmentally friendly approach

Environment

Sabert safeguarding the future

As a responsible business, Sabert has been developing a strategy to safeguard the environment. Since 2007, Sabert has been doing everything possible to reduce its carbon footprint by adopting structural initiatives and sustainable production tooling.

Socially responsible choices

80% of the cartons used for transporting our products are manufactured from **recycled materials**. Because every little helps...

Tomorrow's challenges

Disposable products and environmental responsibility: complementary concepts

The idea of "throw-away" products might seem incompatible with a sense of responsibility for the environment. But at Sabert we are demonstrating the very opposite with our Be Pulp range, and by adopting environmentally responsible technical processes.

Each year, we invest considerable amounts in this area with green or renewable energy. We are doing all we can to reduce our carbon footprint with regular assessments. By using less energy-hungry production machinery and FSC papers and cardboard, and by making our staff more aware of environmental issues, we are improving our performance day by day.

An environmentally responsible range

At Sabert, we are doing everything possible to reduce our carbon footprint. Be Pulp products, which conform to **European standard EN 13 432, are OK Compost or Home OK Compost and Dincertco certified.**

Consumers can also make their contribution to building a healthier world. By opting for the Be Pulp range, they are voting for new ways of consuming, for new products which are fully recyclable and/or degradable. **Find out more about them on page 24.**

The composting process

A product which is OK Compost certified, or compostable in accordance with standard EN 13 432, must disintegrate 90% in a period of between 90 and 120 days. More info on www.okcompost.be

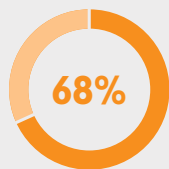

Day 1

Day 30

Day 90

Consumer survey

Quality and attractive appearance

68% of the people questioned during our survey wanted disposable tableware to be of high quality in terms of the materials used, and in terms of its appearance.

Source: Attitudes & usages study - February 2012

Innovation and diversity

Mozaïk, a solution for every circumstance

With family or friends, indoors or outdoors, to throw away or to re-use... There are a thousand-and-one ways of using quality disposable tableware to make life easier. At Mozaïk, we are always seeking to meet consumers' growing expectations by innovating and diversifying the range of products we offer.

Our consumer survey shows that expectations are high where disposable tableware is concerned: **when laying the table for a special occasion, people are looking for quality, style, originality and colour.** In creating the Mozaïk range, Sabert has come up with a complete solution for every decorative theme. Designed to meet the requirements of the most quality-conscious customers, the Mozaïk Colour range will cause quite a stir at weddings, first communions and other family occasions, thanks to a wide choice of bright and contrasting colours. And for those wanting to give their table layout a more formal and stylish aura, without having to hunt for suitable china, Mozaïk offers a wide range of silver cutlery and silver-edged tableware.

New!

The Colour range is extended

Gone are the days when disposable plates and cutlery would bend or break in your hands! Nowadays, the quality of Mozaïk disposable tableware is a recognised fact. Here at Sabert, we are busy reinventing it with, for example, **new plain colour plates with decorative rings.** This determination to reinvent ourselves has led to greater differentiation, enabling us to respond more effectively to consumers' needs, which are also constantly changing.

classic collection

mozaïk[®]
by Sabert

A real benchmark where tableware is concerned, the Classic range offers a wide choice of options when you are preparing for festive occasions, from starter to dessert. Clean lines, elegance and precision make the Classic range a must have for demanding consumers.

Research & development

Disposable tableware reinvented

At Sabert, our R&D department is constantly working to improve our products. As a result, we can guarantee three essential qualities : good design, robustness and fitness for purpose. Because it complies with these three requirements, the Classic range creates the up-market atmosphere we associate with fine food and drink.

In practice

Throw away or... use again

The quality of Mozaïk's Classic range is such that the items can be re-used 2 or 3 times. While use of a washing-up machine, being too harsh, is not recommended for the Classic range, normal hand washing will ensure that our products retain their attractive appearance and can be used again and again. Mozaïk products are therefore a wise choice from a money-saving point of view, an argument which goes down particularly well with modern consumers.

Displays

An all-in-one solution to attract your customers

Featuring a range of attractive products is a sure way of achieving commercial success. Sabert has decided to support its partners in a new sales initiative. By providing displays which are easy to install, move around and dismantle after use, Sabert is proposing a solution to ensure growth. To arouse shoppers' curiosity, all the products – glasses, plates, cutlery, etc. – are housed in the one and the same display case. The slim lines of our displays make them a perfect solution when it comes to meet occasional or seasonal needs.

Information

- Displays of 2 different heights : **1m60 or 1m90** (quarter palette included), but one size: 60 cm wide and 40 cm deep
- Protective cover/hood and Mozaik side panel included
- Optimum integration of products for effective presentation
- Not available from stock
- 4 displays per 80 x 120 cm / pallet

Minimum quantities and lead time to be discussed with your account manager.

Certification

BRC certificate

Based on HACCP criteria and food safety principles, a BRC certificate – of British origin – guarantees the very highest standard of quality management. Branded products which have been granted this label afford an outstanding level of safety. A significant asset in answering customers' questions about H&S issues.

Practical

SRP : boost your sales!

As the Mozaik and Be Pulp ranges are designed to make life easier for consumers, it seems only right that Sabert should do something to make things easier for sales staff. So we have come up with complete solutions for the different ranges. Our shelf-ready packagings is a more practical way of getting products out on display in the store. And the time you save will translate into improved profit margins.

The calmness of the new light-grey colour enhances the product and is well suited to all store environments. This form of presentation will focus shoppers' attention for longer, maximising sales opportunities.

New graphics

Consistency and practicality

Sabert's Mozaik range has recently benefited from an overhaul of its graphics. This not only makes for clarity, but also achieves greater consistency among products belonging to the same or different collections. By emphasising the use to which a product can be put, Sabert promotes direct communication with the customer. Use of appropriate symbols means that the message can be easily understood in all parts of Europe. Finally, new ways of presenting our products are often a welcome source of inspiration for consumers. Featuring Mozaik products is a way of inviting customers to share in an attractive lifestyle.

magazine

be pulp

Certifications

A green approach

Boasting **OK Compost**, **Home OK Compost** and **Dincertco** certifications, the **Be Pulp** range is a perfect response to demand for sustainable solutions where tableware is concerned. Nor does this mean any sacrifice of quality, ergonomics or pleasure-in-use. Be Pulp products will be greatly appreciated by anyone committed to recycling, composting and sustainability.

www.okcompost.be

Recycling

Fine for you, good for the planet

The Be Pulp range was created in response to a growing demand for products which take into account the need to protect and safeguard our planet. Incorporating **bagasse** (a fibrous residue derived from **sugar cane**) and PLA (a biodegradable plastic), Be Pulp products are 100% recyclable and compostable. The cherry on the cake is that they can be used for both hot and cold foods and drinks.

be pulp collection

The aim of the Sabert in-house environmental initiative is to reduce the carbon footprint. The plates, cups, cutlery, bowls and platters of the Be Pulp range are eco-friendly without any compromise on quality.

Sustainable development

A new consumer philosophy

The world is constantly changing. The Bepulp range is Sabert's solution that reflects those changes by ensuring environmental protection combined with high food safety standards..

Survey findings

Show off your dishes

Colours are in! In presenting its Colours range, Sabert is inviting the consumer to be bolder and more original. All in all, a fun approach to tableware, which has revealed some surprising facts. For example... According to a survey conducted by the Polytechnic School of Valence (France), **hot chocolate tastes better when drunk from an orange cup** and **water is more refreshing when drunk from a blue one**. Coloured tableware is undoubtedly pleasing on the eye but, in addition, the contents are better!

The survey

76% of the people questioned said they liked to party and saw coloured tableware as a way of making an occasion even more special.

colour collection

mozaïk®
by Sabert

An evening with friends? Want it to be funny & different? The Colour collection effectively meets all your needs. Made with same high quality standards Sabert is known for, this collection helps you create the special festive atmosphere you imagined.

Consumer behaviour

A must the moment the sun comes out

As spring turns to summer, there are increasing opportunities to get together out of doors. With our **Colour range**, we at Sabert bring a **touch of fantasy** to these magical moments. The wide range of items encourages **imagination and creativity**. And the sheer quality of the Colour range makes it suitable for all types of events..

Quality

Transparent colours to enhance your summer dishes

Is coloured tableware a gimmick? Not in the case of Sabert. We take pride in supplying high quality disposable tableware across all our ranges. Where the Colour range is concerned, we have sought to respect two imperatives: to ensure our tableware is made to **the highest standard** and to offer **new colours** that correspond to **contemporary trends**.
